/ ardesia walnut

9 nero carbone
/ carbon black

Aluminium and steel

Sandblasted matte finishes obtained by melting powdered epoxy varnish onto the metal at a temperature of 180°C. Thanks to this process, the varnish penetrates deep into the cavities of the material to ensure strong adhesion and effective resistance.

OM oro **metallux**
/ **metallux** light gold

/ sandblasted black

100% recycled wood

Our commitment to the environment reflects in the use of laminated products CARB2/US EPA certified made in Europe by leading companies.

Furthermore, using the Ecological Panel, the world's first 100% recycled wooden piece, no cut trees are involved in the production.

The raw Ecological Panel is the result of the pressurisation of diverse granularities of wooden particles using resins. The outcome is a made-in-Italy environmentally friendly product that is recycled and recyclable, the result of a worldwide unique process able to combine advanced technology and absolute respect for the environment.
